

Assignment 6: Triage Pseudocode

1. Start
2. Record patient chief complaint, history and initial vitals
3. Is the patient experiencing a life threatening condition? (cardiac arrest, major trauma, shock, $GCS \leq 8$) If yes, continue to Step 4. Else, jump to Step 5.
4. Assign ESI 1 (Resuscitation). Jump to Step 12.
5. Is the patient high-risk or are their vital signs in the danger zone? (e.g. $SBP < 90$ or > 200 or $MAP < 60$). If yes, continue to Step 6. Else, jump to Step 7.
6. Assign ESI 2 (Emergency). Jump to Step 12.
7. Does the patient require ≥ 2 clinical resources? (sepsis, abdominal pain) If yes, continue to Step 8. Else, jump to Step 9.
8. Assign ESI 3 (Urgent). Jump to Step 12.
9. Does the patient require 1 clinical resource? (simple laceration, urinary tract infection) If yes, continue, to Step 10. Else, jump to Step 11.
10. Assign ESI 4 (Semi-urgent). Jump to Step 12.
11. Assign ESI 5 (Non-urgent/No clinical resources needed).
12. Stop

Assumptions:

1. A nurse is conducting the triage assessment.
2. The assessment is strictly ordered with no backtracking to previous steps/
